OBJECTIVE

Aspiring Full Stack Software Engineer with hands-on experience in React, TypeScript, Git and MySQL. Eager to contribute to impactful web applications and grow in a collaborative, innovative development team.

WORK EXPERIENCE

Full Stack Software Engineer – Intern

iAm TechSolution Inc.

📅 February 10, 2025 – May 16, 2025 📍 Makati, Philippines

- Collaborated on full-stack development using Fastify (Node.js framework) and React with TypeScript, focusing on building robust, scalable web applications.
- Implemented RESTful APIs, database schemas, model relationships, and backend logic using MySQL and Sequelize; conducted API testing via Postman.
- Developed responsive and user-friendly front-end interfaces using React, Vite, SASS, and Framer Motion, incorporating React Router, custom hooks, and SEO best practices.
- Integrated frontend and backend systems, managing state and props effectively, and applied modular design patterns for maintainable code.
- Utilized Git and GitHub Desktop for version control, collaborating with a team of developers and reporting progress to supervisors in Agile-style meetings.

PERSONAL/ACADEMIC PROJECTS

Portfolio - <https://joechristianlina.netlify.app>

UI Clones – Spotify, Netflix, and Disney+ (CSS + HTML)

- Created front-end clones of popular platforms including Spotify, Netflix, and Disney+, replicating homepages and media browsing experiences.
- Built custom components like image slider and dynamic content sections using modular CSS
- Applied advanced styling and animation techniques

EZMinutes – Minutes of the Meeting Transcriber

(Capstone Project) - Python

- An AI-based tool that transcribes audio with speaker diarization and allows editing and summarization of meeting minutes.
- Utilizes natural language processing to extract key ideas and topics for easy minute generation.
- Designed for usability and clarity, aiming to automate documentation in professional environments.
